

Task Reminder Documentation

Welcome to Task Reminder!

Task Reminder is an app that reminds users of their open tasks in Confluence via email. These emails are sent in a configured interval using a [scheduled job](#). The following attributes can be configured by Confluence administrators:

- In what intervals and when should reminder emails be sent?
- What users and groups should receive reminder emails?
- What type of tasks should be included in emails?
 - Tasks already expired
 - Tasks expiring soon (it can be configured what *soon* means)
 - Tasks expiring later (it can be configured what *later* means)
 - Tasks without due date
- What should emails look like, i.e. what should be the content and appearance of these emails?
- What contents in emails should be translated for a multi-language user base?

The configuration elements are described in detail in our [Task Reminder Administrator Guide](#).
